Amendments to the Specification:

Please replace the paragraph beginning at page 4, line 27, with the following amended paragraph:

-- The image processor 100 includes an image analyzer 110, a parameter calculator 120 and an adjustment tool 130, such as a local adjustment tool for tone selective adjustment described in U.S. Patent Application No. 10/678,366[[_____]], filed on 10/3/2003, entitled TONE SELECTIVE ADJUSTMENT OF IMAGES the entire disclosure of which is hereby incorporated by reference in its entirety. The image analyzer 110 analyzes the image 10 and provides results of the analysis to the parameter calculator 120. Based on the analysis, the parameter calculator 120 determines parameters for the adjustment tool 130 to adjust the image 10. The adjustment tool 130 can use the determined parameters directly to adjust the image. Or the adjustment tool 130 can receive user input that modifies the determined parameters, and use the modified parameters to adjust the image 10. --
